50c. PER YEAR, IN ADVANCE

SELECT DAIRY COW BY TYPE

Milk Production and Reproduction
Are Essential Functions—Records
Are Lacking.

The essential functions of the dairy
cow are milk production and repro-
duction. According to L. W. Wing, Jr.,
of the Missouri College of Agriculture,
the most accurate methods of deter-
mining these are:

(1) Milk production by means of
the milk scales and the Babcock test;
(2) Reproduction by breeding records.
There is only a small proportion of
the cows used for dairy purposes on
which such records are kept. This ne-

Champion Dairy Cow.

cessitates the employment of some
other method of selection. In the
breeding of high producing animals
through several generations it has
been observed that there are certain
characteristics of the conformation
which are correlated with large pro-
duction. These characteristics are
namely: (1) Extreme angular form,
carrying no surplus flesh, but in good
physical condition. (2) Prominent de-
velopment of the udder and veins. (3)
The symmetrical development of the
teats with large capacity. After one
becomes familiar with these external
characteristics it is possible to select
cows producing 300 pounds of fat per
year from those producing 150 pounds.
The difficulty comes in picking the animal
that will produce 500 pounds of fat
per year compared to the one pro-
ducing 400 pounds.

The selection of animals by this
method is rather uncertain. Until re-
cords are kept of more animals or some
other means devised for selection, the
selection by type should be used and
it is up to everyone interested in
dairy cattle to become familiar with it.

LEGUME HAYS ARE VALUABLE

Utilization of Alfalfa or Clover Partly
Solves Dairyman's Prob-
lem of Feed.

(By G. E. WEAVER, University Farm,
St. Paul, Minn.)

One hundred and seventy-five pounds
of good alfalfa or clover hay is worth
as much as 100 pounds of the ordinary
grain feeds. With the present prices
for feeds ranging from \$25 a ton for
bran to \$85 per ton for corn, the aver-
age cost for 100 pounds of grain is
about \$2.75. The cost of its food
equivalent in the form of 175 pounds
of legume hay is \$2.15. This much hay
will produce 200 pounds of milk and
effect a saving in feed cost of 60 cents,
which is at the rate of 30 cents for
each hundred pounds.

The utilization of such hay partly
solves the dairyman's problem in these
days of high feed cost and milk in-
vestigations.

HEIFERS OF GOOD BREEDING

No Stock More Profitable as They Con-
sume Less Compared With
Growth They Make.

No stock pays better to grow at
this time than young heifers of good
breeding. They consume less feed com-
pared with valuable growth than al-
most any other animal and there sure
will be a good market awaiting them
when they begin to be cows. They
should be kept thrifty and doing their
best, though—and a very little grain
will do this.

TWO COMBINATIONS ARE POOR

Good Cow in Hands of Unintelligent
Dairyman Is Most Undesirable
Dairy Proposition.

A good cow in the hands of a poor
dairyman is a poorer proposition than
a poor cow in the hands of a good
dairyman. Both are very poor com-
binations, however; a good dairyman
will not keep a poor cow more than
one season.

STRONG FENCING FOR STOCK

Where This Improvement Has Been
Overlooked There Is Sure to Be
Trouble in Herds.

Remember that it takes a good
strong fence to hold the cows and
calves apart during the long winter
months, and where this improvement
is lacking there is sure to be trouble
for you.

FOR BETTER ROADS

IMPROVING THE BAD SPOTS

Certain Small Ruts That Are Usually
Wet and Soft Determine Load
Farmer Can Carry.

The worst holes in the road always
determine the load the farmer can
market. No stretch of roadway is uni-
formly good, because every road has
certain small spots that are usually
soft and wet. These spots cause more
trouble than the rest of the road com-
bined. How these spots are to be im-
proved depends on the character of
the soil, and the nature of the coun-
try. Many such spots owe their char-
acter to a soft subsoil, due to springs.
Before these roads can be permanent-
ly improved they must be under-
drained. If a tile is laid in these
places there will usually be no trouble
in the future. The surface of the road
should then be filled with dirt and
crowned, so any surface water may
run off. If this is done there will be
no trouble from subsurface water.

Many roadways that are closed in
with shade trees are bad. If a goodly
portion of the scrub timber along these
roads be removed, the ground will dry
out and no trouble result. If the char-
acter of the soil is soft and pliable, so
that it will not pack and remain firm,
new material should be applied to the
surface. The best and cheapest mate-
rial for improving roads is gravel.
Where gravel beds are accessible a
day's work with a team and wagon
will improve any roadbed permanent-
ly. If the soil is very sandy an 8-inch
application of clay to the surface will
effect wonders. The road patrol should
spend a considerable portion of its
time in remedying the bad spots in the
road.

ANSWER TO PRISON PROBLEM

New York and Other States Have
Tried Experiment of Using Con-
victs to Improve Roads.

New York and many of the Southern
and Western states have tried the ex-
periment of using convicts to improve
highways—and it has worked to per-
fection. The official organ of the New
York state prisoners says that "no
man of all the inmates who went out-
side last year had a word of fault to
find with his treatment. All are anx-
ious to join these camps again. The
freedom of movement and the exer-

Convict Gang at Work.

cise shortens the time yet to do in a
wonderful manner. Many states have
found road work to be the answer to
the prison problem. Colorado and Cal-
ifornia have rebuilt the better portion
of their roads with prison labor, and
besides feeding the inmates with an
extra supply of food, it has also led to
a lessening of time through provisions
made by the farsighted legislators.

WIDE TIRES IMPROVE ROADS

They Have Same Effect on Country
Highway as Roller on Field—
Also Pull Easier.

Wide tires build up roads and save
horse labor. They have the same ef-
fect upon a country road as a roller on
a plowed field. On the other hand, the
narrow tire cuts up a road like a disk.
It has been found by actual test in this
matter that the wide-tired wagon
pulls easier in nearly all cases than
the narrow-tired wagon. In deep mud
on a country road the wide-tired wag-
on pulls 6.2 per cent easier. On the
country road with a thin surface of
mud or deep dust, however, the nar-
row tires pull 4.9 per cent easier. In
a cornfield the wide tires pull 30.5 per
cent easier, in a dry alfalfa field 17.7
per cent easier, and on a dry country
road 10.2 per cent easier.

Ontario Makes Good Roads.

The Province of Ontario has ap-
proximately 55,000 miles of roads.
More than 43,000 miles have been
treated and are in fairly good condi-
tion. About 20,000 miles are well
graded earth roads; about 8,000 miles
are surfaced with broken stone, and
about 19,000 are surfaced with gravel.

All Roads Lead Home,
All roads lead to home. You are not
at fault if they are not all good roads,
but you are to blame if it's not a good
home.

Do You Know the Terms of that 22,000 Mile Test?

GREEN-FORD AUTO CO.
Agents Greenville, Ky.

You know, of course, that the Maxwell Motor Car is the long distance champion
of the world.

You have read that a "stock" Maxwell 5-passenger car ran for 44 days and
nights without stopping the motor.

And that, in the 44 days non-stop test, the Maxwell covered 22,022 miles, at
an average speed of 25 miles per hour.

But have you, up to now, realized the full significance of that performance?

Do you know that no other motor car in the world has ever equalled or even
approached that performance?

In a word, did you take this test seriously when you heard of it?

Or did you set it down as a "selling stunt" to give the publicity man something
to talk about?

It's worth your while to read and to study the conditions under which that test
was made.

You know that the American Automobile Association (familiarly known as the
"A. A. A.") is the official arbiter of every automobile test and contest.

But perhaps you didn't know that when a maker places his product under A. A. A.
supervision he must do absolutely as told and abide by the decisions of the Board.
That's why there are so few A. A. A. Official Records!

This 22,000-mile Maxwell non-stop test was official from start to finish.

Therein lies its value to you.

It proves absolutely the quality of the car—of the very Maxwell you buy.

For verily this was a "stock" Maxwell. Listen:—

First: the inspectors disassembled the motor to see that no special pistons, valves,
bearing-metal or other parts had been used.

Every other unit was as critically inspected. Then the car was re-assembled
under their own supervision.

As we had much at stake and the test was made in winter (November 23 to
January 5) we asked permission to take certain little precautions against acci-
dental stoppage.

Sounds reasonable, doesn't it?

But they refused permission to do any such thing.

For example:—They would not permit a rubber cover over the magneto—it
wasn't "stock."

They refused to let us tape the ignition wire terminals—they are not taped on
the Maxwells we sell—so of course it wasn't "stock."

Neither would they let us use a spiral coiled pipe in place of the usual straight
one from tank to carburetor to guard against a breakage from the constant,
unremitting vibration—it isn't "stock."

Nor to use a special high priced foreign make of spark plug—the run was made
on the same spark plugs with which all Maxwells are equipped.

So rigid were the rules, we were unable to carry a spare tire on the rear—it
wasn't "stock." A telegram to headquarters in New York finally brought a
special permit to carry a spare tire.

"It isn't stock!" "It isn't stock!"

That was the laconic reply of those A. A. A. inspectors to every last suggestion that
called for anything but the precise condition of the standard, stock model Maxwell
that any customer can buy from any one of 3000 dealers anywhere.

We are glad now—mighty glad—that the rules were so strict and so rigidly
enforced.

Any other car that ever attempts to equal that record must do it under official
supervision—and comply with the same terms.

And it will have to go some.

For Maxwell set the standard when it performed this wonderful feat.

Maxwell complied with those rules—and made good.

Every drop of gasoline and oil and water was measured out and poured in by
the inspectors themselves. They would not even let our man pour it in!

Every four hours the car had to report at the official station for checking.

And it had to be there on the minute.

And every minute there was an inspector beside the driver on the front seat—
two more men in the rear. One got out only to let another in—a day and
night for 44 days and nights!

There was one technical stop.

It is interesting to know the circumstances.

Dead of night—a driving storm—a cloudburst—suddenly another car appeared
in the road ahead.

In his effort to avoid a collision the Maxwell driver stalled his motor.

At least the observers thought it stopped and so reported.

The car did not stop, however, so its momentum again started the motor (if it
had indeed stalled) when the clutch was let in.

The contest board exonerated our driver on grounds that his action was neces-
sary to save life.

That shows you how rigid were the rules—how conscientiously applied by the
observers.

You who have owned and driven motor cars—you who know how small a thing
may clog a carburetor or a feed pipe; "short" a spark or stall a motor—will
realize what a wonderfully well made car this must be to go through that test
under those conditions—44 days—22,022 miles without stopping.

The exact amount of gasoline, of oil, of water used; the tire mileage, tire
troubles, tire changes; the distance and the routes are matters of official record,
attested under oath and guaranteed by the A. A. A.

(By the way, the average was nearly 10,000 miles per tire.)

Any Maxwell owner—or anyone interested may see these records.

And—here's the most wonderful part—though no attempt was or could be made
for economy; the Maxwell averaged 23 miles per gallon of gasoline.

Some other car may, some time, equal some one of those performances. But to
equal them all in the same test—that car must be a Maxwell.

--- This paper has enlisted with the government in the cause of America for the period of the war ---

For Congress.

We are authorized to announce that **MR. HENRY H. DENNISON** of Warren county, a candidate for Congress from the Third Congressional district, subject to the action of the Democratic primary, will be held in August, 1918.

With a few more blows like that of last week the props under automatic rule will begin to fall.

With the boche kindly turned around so that we can see whether they sneer for the American army is still on his face?

Oh, boys who are shot up in the war and come home to suffer every sort of wound except an injury to the pen arm. Or do they dictate?

Portraits may be adjoined in some places, but political spellbinders in convention are beginning to speak once more in "no uncertain tones."

Under the law recently enacted by Congress, President Wilson has issued an order taking control of the telephone, telegraph, cable and radio systems of the country. The order becomes effective on July 31, and will hold to the end of the war. The operation will be under the control of the Postmaster General.

See the "Restgood" line of hair mattresses and pillows at Roark's.

Examine the line of "Restgood" all-leaf mattresses at Roark's. Finest line of goods ever carried in this section, and the cheapest, for one will give perfect satisfaction for an ordinary lifetime. Pillows of same material.

Trade with Roark, who teaches your dollars to have more cents.

One of the boys recently home on a furlough says that he has been doing so much kitchen police duty, where he learned not only cooking but general salitary and housekeeping duties, that when he gets back from war he will make some girl a mighty fine wife.

Golden Star furniture polish, best made, at Roark's.

The L. & S. depot at Lewisburg was destroyed by fire last Sunday night, together with its contents, consisting of a considerable amount of general merchandise. The building was comparatively new. The cause of the fire has not been determined.

Anybody can cut prices, but no salesman can put qualities in goods not already there. That is why Victrolas, alone, of the whole talking machine family, sell at the full price, the world around.

Rev. James Baird is ill at the home of his brother, Mr. T. C. Baird. Rev. Baird and his wife have been here a few weeks, on vacation, coming from their home at Monticello. He has been doing extra work and study, and has suffered a nervous breakdown. He has a host of friends and admirers who hope he will soon be restored fully, to resume his useful, helpful activities.

Buy the best value in American pianos, the Lyon & Healy, from Roark, county distributor.

Job printing at this office.

ROAD BUILDING

BENEFITS OF CONCRETE ROAD

Make Travel Quick, Safe and Easy, Clean and Comfortable—Save More Than It Costs.

Concrete roads are country boulevards. They benefit a community in making travel quick, safe, easy, clean and comfortable. They extend neighborhood limits, bring more people into personal touch with each other, increase social opportunities and thereby remove the monotony of isolation; bring greater content to the youth on the farm, make city and country near neighbors and increase school attendance, thus cultivating a desire for a broader knowledge and higher standards of living.

Concrete roads make daily rural mail delivery a fact, every home unit in the community is put on the news wire with the political, financial, industrial and trading centers of the world. The best thought of the world in every line of human effort and human achievement is transmitted overnight to the breakfast table of the community served by a network of concrete roads. A concrete road saves more than it costs. It is open to maximum traffic all the year round. It brings greater freedom and ease of movement in travel and transportation and permanently increases land values.

MADAM WAS ROAD REPAIRER

He Originated Method of Covering Surface of Ground With Impermeable Crust or Covering.

Just 200 years ago was born "the first of the pioneers who took up the work of scientific road building." John Macadam showed how to carry solid highways across difficult bogs, and Thomas Telford built his roads, topped with gravel, on a solid foundation of stone blocks. But the great reform of the art came in with John Loudon Macadam, who traveled 30,000 miles over the English and Scottish roads to study the conditions and needs for himself. Bestowing a new word on the language, he originated the method of covering the surface of the ground with an impermeable crust, cover or coating, so that water would not penetrate to the soil beneath. A road thus "macadamized" was found to yield less easily to weights pressing upon it, and could not be broken up by the action of frost. But while the inventor's fame spread his resources dwindled, and though made surveyor general of roads, he had to depend for his recompense on a parliamentary grant. Macadam was a road repairer rather than a road builder, but his system went all over the world.

Macadamized Road.

oring the surface of the ground with an impermeable crust, cover or coating, so that water would not penetrate to the soil beneath. A road thus "macadamized" was found to yield less easily to weights pressing upon it, and could not be broken up by the action of frost. But while the inventor's fame spread his resources dwindled, and though made surveyor general of roads, he had to depend for his recompense on a parliamentary grant. Macadam was a road repairer rather than a road builder, but his system went all over the world.

SPRING CARE OF HIGHWAYS

Go Over Road With Grader to Clean Out Ditches—Fill All Ruts With New Material.

Every spring before the ground becomes too hard the road should be thoroughly gone over with a grader to clean out the ditches, so that the water may have a free outlet. The ruts and holes should be filled, elevations in the road and shoulders on the side of the road planned off, the grade improved, and the road put in good condition.

Earth roads have a pronounced tendency to rut. When ruts begin to appear on the surface great care should be used in selecting new material, with which they should be filled immediately. One fundamental principle that is of special importance in the repair of any road is that whatever material is used in the construction of the surface, the same material—and no other—should be used in its repair. A good road with a surface of clay should be repaired by using clay, a gravel road with gravel and a surface of limestone with limestone.

Hog Needs Protection. The hog is rather scantily provided with hair and the warmer the country the less hair. Therefore, he needs protection during the storms of winter. Unless you provide it, you invite colds, influenza, lung troubles, pneumonia.

Sowing Slow Seeds. In sowing seeds that start slowly, as parsnips, celery, etc., it is well to sow with them a few strong, quick-germinating seeds to break the crust and mark the rows so that cultivation may begin early.

Roark is in better position to give you, Victrola and record service than many dealers in cities of 10,000 inhabitants. Orders are placed many months ahead, and stock is larger here than can be found elsewhere, in Victor goods, which have always been hard to get, on account of the world wide demand, and more difficult to get now than ever before.

The Federal Explosive Law.

The Federal Explosives Act prohibits the manufacture, sale, purchase and possession of all explosives and their ingredients, in time of war, without a license. In other words, the dealer must keep an itemized record showing the name and address of purchaser, his license number, kind and quantity of explosives purchased, and purpose for which it is to be used. This also compels practically every drug store in the United States to have a license permitting them to have in possession and sell explosives ingredients, and the buyer must have a license when purchasing these ingredients in quantities of an ounce or more, and the dealer must keep the same record as the party who sells dynamite. These ingredients are: Bichromates, Chlorates, Chromates, Nitrates, Nitric Acid, Perchlorates, Perborates, Permanganates, Peroxides and Phosphorus, in their various forms.

This law will be rigidly enforced in the future; it having been in effect since November 15, 1917, and every dealer has had time to familiarize himself with the law and all its details, and no excuse will be accepted in the future. Violation of this Act carries a penalty of \$5,000 fine or imprisonment in a Federal prison, or both. A careful and systematic check is being made, by Federal Authorities, of every dealer in the State who handles explosives or ingredients, regardless of location or size. An inspector or some deputy may drop in any day, and dealers should not allow themselves to be caught unprepared.

There is a United States Explosives Licensing Officer in every County, and such dealers as have not already procured their license should take immediate steps to do so.

This is considered one of the most important war measures enacted by our Congress, and dealers can not be too careful in making sales of explosives or their ingredients.

Large stock of mirrors at Roark's. Small prices.

Everybody pays the same price for the Victrola, while no two persons pay the same amount for other machines. Buy the machine of recognized, superior qualities from Roark.

Read the article "Wheat Will Win the War," County farm agent Grady reports that he has enrolled a vast number of patriotic farmers who plan to increase their wheat yield for next year, as wheat will help as much as any one thing in winning the war.

You can get any other machine you want, at any time, but you will keep the Victrola forever, when you get it. Better wait for the one you want, and which so many people all over the world want, that deliveries are behind the demand. Roark expects liberal shipments soon, or orders placed many months ago.

Small rooms can be papered at half, from Roark's remnants.

We're here to help you get the best results and the most satisfaction from your talking machine, no matter what make, and our eight years' experience is freely at your command, and should be of benefit to you. The J. L. Roark Estate.

Sharp Practices Cannot Endure.

For eight years we have been distributing Victrolas in Muhlenberg, and our faith in them is much stronger now than when we secured the agency, for the decision reached then, after an exhaustive study of all machines on the market, led us to the Victrola, and its performance has given most complete satisfaction to every purchaser, so much so that from first to last machines sold by us are in the hands of the original purchasers. The field is enlarging rapidly, and in time practically every home will have some sort of machine. It is to our interest, and to the more vital interest of every buyer, that most thorough investigation be made in the selection of this item. We have at all times a representative stock of instruments and records, and gladly give public demonstrations. Records of all machines will be played, and the most thorough investigation and comparison of both machines and records should be made by you, and are invited by us. No "cheap" practices have ever been used by us in making a sale, and we will not resort to "cheap" methods, "deception" or "trickery," "deception" or "trickery" of records in the making of "deceptions" and other hoodwinking acts and statements followed by some dealers. Everybody gets a square deal from us, before and after sale, and we refer to our large family of Victrola users, our best incentive and greatest asset in the continual enlargement of this branch of our establishment. Very truly yours, THE J. L. ROARK ESTATE, Orlan L. Roark, Manager.

Land Owners Must Cut Weeds.

Under a law passed by the last Legislature, all persons owning land adjoining public highways are required, between July 1 and August 20, each year, to cut down all weeds, brush and undergrowth along such roads. Hedges must not be allowed to exceed five feet in height, and everything done to give a plain view of traffic on all curves. This is done primarily to make travel safe, but it will also add much to the appearance of the rural sections. The law is being observed in many sections of the State, but so far as can be learned, there is little attention being paid to it here, probably because land owners are not familiar with the law. As the penalties are very severe, it will be necessary for much work to be done at once, as the limit will soon be up in which this important work can be done, to comply with the law.

Get your order placed with Roark for a Victrola, as for months there has been a waiting list, on account of the world wide strong demand for this instrument. While large stocks of machines are always on hand, it has been many a moon since all type instruments have been here at one time.

Nation-Wide Preparedness

North, South, East, West—all working to put the Nation in fighting trim!

Army and Navy departments and districts, camps, yards, coast-guard stations, light houses, munition, construction and textile plants—all coordinating to mould the vast organization into an effective homogeneous force! And in this enormous task the country's telephone network has been and will continue to be the great indispensable agent of communication.

The Bell system has enlisted every resource at its command and offered all unreservedly to the government.

This, together with the immensely increased commercial demand for service, the general shortage of materials, and the enlistment and draft of a large number of technically trained employees who cannot be replaced, will, it is hoped, be borne in mind by every loyal American if there should later result the necessity for subordinating private convenience to the pressing needs of the government.

We are not sitting idly by and waiting for a bright day when our money can buy equipment. We are using every means at our command to keep our service up to its usual high standard. You will want to help because you will be helping your own service and enabling us to do a better job for Uncle Sam.

We appreciate co-operation. CUMBERLAND TELEPHONE AND TELEGRAPH COMPANY Incorporated

J. C. MORGAN, Local Manager, Greenville, Ky.

Her Happiness and Theirs

Is assured on this outing for they brought along their Portable Victrola, and in play, at rest or when friends gather at the camp, all the good things in the Victor record library can be presented.

See and Hear This \$22.50 Victrola

It has all the exclusive, patent-protected features of the larger members of the Victrola family, and is worthy of a place in any home. Get yours now, and be ready for summer joys at home or wherever you go.

The White is King.

Rubber fly swatters at Roark's.

Hear the July Victor records at Roark's.

August is getting ready to make its appearance.

As goods get scarcer, the price is more plentiful.

Old newspapers for sale at this office.

Snap in high grade wallpaper at Roark's.

Among the clothes which are "much worn" this year are last year's.

Use a Cleanrite brush on your Victrola, getting better results and protecting your records.

Miss Emily Frances Rasco is here from Cadiz, a guest of her sister, Mrs. C. A. Denny.

The Victrola, with many exclusive features, is supreme. A demonstration convinces. Roark will be glad to meet any test.

We had a light shower Monday, which did considerable good, but a good rain is badly needed.

Get satisfaction—buy a Victrola, for it constantly delivers the best instrumental and vocal music of the world, without expense and worry.

Hons. Gus Thomas and John D. Carroll, of the Appellate bench, were mingling with friends here the first of the week.

Several one room patterns of wall paper at Roark's are offered at cut prices.

Mr. Duncan Stevens has been home from Camp Taylor for a few days, with home folks and friends.

Standard in price and quality, the Victrola stands on a pinnacle. Have fullest demonstrations and comparisons at Roark's.

Mr. Miller Walton, who is located at Ft. Sam Houston, Texas, is here on a short visit to his parents, Mr. and Mrs. John Walton.

The largest stock of talking machine records to be found in this part of Kentucky can be found at Roark's.

Interest in the special road tax question is gaining much strength, and it is sure that there will be a large vote polled at the special election.

Silent, swift, simple, strong, the White is the greatest sewing machine on the market. Full line on the floor at Roark's, and you are asked to see them.

If one or more of the German submarines would land some of the bunting over here they used to use over there we might camouflage it and make use of it.

Roark maintains two demonstration rooms, for display of Victrolas and demonstration of records. Drop in any time, whether you wish to purchase or not.

The French and English have been saying of the German soldiers "They shall not pass," but our boys have been giving them the Yankee "Get to—out of here," and making it go.

Careful planning, many months ahead, enables Roark to be in position to supply your Victrola and record wants much better than dealers in many large cities can do for you.

Next Monday is county court day, and it is likely that there will be a good-sized crowd here, as farmers are not so awful busy, and the interest in the primary election is warming up somewhat.

Seventy-seven Men Leave for Camp.

Muhlenberg furnished its quota of men on the recent call, when 77 selected men left here Monday afternoon for Camp Taylor. It was one of the largest units sent from here, and the appearance and spirit of the men were first class. Several hundred relatives and friends from all parts of the county gathered here to bid them God speed, and our interest and patriotism have been heightened by this new offering in this noble cause.

Mr. Pallas White, of St. Louis, was here with relatives and friends a day or so during the week. He has a responsible traveling position with the Ely-Walker Dry Goods Co., and is rapidly climbing to the top.

See the strong line of Victrolas on Roark's floor.

An observer remarks that if all the "war" baby boys born during the year were named for Wilson, that our first President would be a very poor second.

Two stalls, in a stable, for rent by day or month. Apply to Mrs. J. G. Bohannon.

More Victrolas are in use of the public schools of America than all other machines combined. Two years ago there were 6,200 schools using Victrolas, and a careful census, just completed, shows that more than 25,000 schools use this one machine. This is a quadrupling in two years, and shows how the influence of music is growing, and also how the superiority of the Victrola is appreciated. See and hear why at Roark's.

Wheeler & Wilson sewing Machine No. 9, in good working order, for sale. Apply at this office.

Mr. Otto A. Rothert will arrive from Louisville the middle of next week, and will spend a few days with his Muhlenberg friends.

Hin the Hun has been killed—again.

There is extra activity in the movement of railroad ties, now, and a large number of wagons are engaged in delivering to the station here.

Misses Elizabeth and Margaret Vance Colville, of McMinnville, Tenn., have been here on a visit to their aunt, Mrs. H. A. McNary.

A hair mattress lasts a lifetime, and gives greatest service. Get one from Roark.

Good morning! Have you listed your property with tax commissioner C. W. Cisney?

Needles and all sorts of sewing machine supplies at Roark's.

Many trainloads of men are being moved from Camp Taylor, to make room for the last call, and it is reported that 50,000 new men will arrive at that camp during August.

Nothing half so good—get a rubber fly swatter from Roark.

War news has not been so terrible to us, lately, as the way affairs have been going for the past ten days are quite to our notion as to what our boys could and would do.

Mr. Ellis Ford was in Louisville on business this week.

Machinery trouble has been interfering with our electric lights, lately, and all day Tuesday there was no light, to allow workmen to make needed overhauling of the plant.

Bought for one, enjoyed by all—that's the Victrola.

While Muhlenberg is beginning to suffer for the need of rain, reports from Logan and Warren are distressing, as crops are so badly damaged that nothing like a full yield will be had, no matter how favorable the weather may be from now on.

Worm gears, with ball-bearing points, the Victrola motor surpasses the bevel-gear motors in other machines to same degree it does in every other feature.

Mr. G. T. Stites, of Louisville, was calling on the trade here the first of the week. There is a growing scarcity of traveling men. Vast numbers of these men are in the service, and a lack of goods and increasing cost of travel are combining to take most of them off the road.

New Baptist Church Building Contract Let.

For some time the members of the Baptist church here have been discussing building a new church. This has been hastened by an investigation which developed that the edifice was showing signs of danger, as the back walls were cracked badly, and the tower was also displaying some weakness. Joseph & Joseph of Louisville were employed as the designers, and their plans were adopted. Bids were opened last week, and the building committee awarded the contract to the Sherrill Russell Lumber Co., of Paducah, their bid being \$26,600. Work of razing the old building was started Monday, and it will not be long until the new building will be started. It will be a commodious, convenient and attractive structure, an honor to its builders and to the city.

Farmers are not heeding the new law requiring the cutting of weeds, along the highways.

Save Money For Farmers.

We are assured on high authority that if birds were as numerous today as they were 60 years ago it would mean a saving of many million dollars to American farmers. The slaughter of migratory birds is surely followed by the increase of destructive insects. Among the farmer's bird friends are the woodpeckers, especially the red-headed members of the species.

In proof there is cited the following instance: A pair of them nested in a dead cottonwood tree near an orchard. One day the observer watched them through a pair of glasses. The young birds were about half grown. The parents made 96 trips in one hour, each time with a worm. It is safe to say that they saved 96 apples in that hour—a box worth, say \$1. If the birds worked ten hours a day, they were worth \$10 to the owner of that orchard, or, in the three weeks the birds were in the nest \$210. It is plain, then, that no farmer can afford to kill a woodpecker.

The Victor tungs-tone supplies your need in needles. See Roark.

Colored Troops Win Honor.

It is a matter of pride to every one when the patriotic response of the colored men to the army draft is considered. There has not been discovered a single slacker in this county, and not a deserter has been reported from any camp. Colored troops in France are also winning highest praise, and when this war is won the colored people will have the supreme satisfaction that they have done their full share, for it is all over the country as it is here.

Victrola owners are the most exacting and at the same time the most pleased body of people in the county, the same as they are the world over. Join them, and you will know why. See and hear these instruments at Roark's before buying any machine.

Mr. Leonard Fleming came up from Camp Shelby the latter part of the week, and will spend a few days here with home folks. There is quite a bunch of Muhlenberg boys at this camp, and all of them are well and making high records in the service.

Tuesday Night Rain a Winner.

One of the best rains we have had in several weeks fell Tuesday night, and the amount of good done cannot be estimated. There have been several good rains in different sections of the county during the past week, but little of it reached here.

You are practicing economy when you buy a Victrola from Roark, for the upkeep is nothing. Ask any of the 350 Muhlenberg owners; also ask owners of other machines what they are paying for springs and other repairs, and how much time their machines are out of service for various reasons.

Until further notice, under orders of the United States Fuel Administration, effective July 24, there will be a State-wide "Lightless Night" season, for Monday and Tuesday nights. It applies to all outside signs and other lights which may be dispensed with. The demands of the government for coal are enormous, and every means is being employed to conserve all the fuel possible. Use of lights for displaying show windows is forbidden on these nights, unless the place is open for regular business.

Music A Necessity.

Every regiment in the service of the United States has its band.

The men march better, work better and are happier with music!

In every cantonment and training camp—on battleships and cruiser, music is the chief source of pleasure and recreation!

Every moving picture house and place of amusement in the world has music!

The churches open and close divine services with music.

Our schools, colleges and kindergartens devote much attention to music and its study.

Our people are more firmly welded into a strong, homogeneous nation through singing patriotic music!

Every home needs the refining, educative, inspiring influence of music. The pleasure of music is more lasting than any other, and is therefore of greatest benefit. See Roark, and let him help you plan this betterment of your home.

A very enthusiastic but uninformed patriot was heard to say a day or so ago, in commenting on the war situation, that he was glad the Allies had driven the Germans over the Marne, and now that we were in Germany, hoped we would not be long in getting to Berlin, and have the thing over.

"Lightless nights" are to be observed on Monday and Tuesday, until further orders.

Victrolas "over here" render the same inspiring service they do "over there," and not a camp, fort, ship, hostess house, trench, Y. M. C. A. hut, hospital or recreation center, here or abroad, in allied or enemy lines, but has a Victrola, thousands being in constant delightful use. Every home in this land now needs this instrument more than ever before, and more are being enjoyed. Get yours, now, from Roark, and start on a new high road of living.

Study Will Save Sorrow.

More than in any other item, prospective buyers should make a close study of the talking machine field, for very few people know much about such articles, and it is too important to jump into the game. In presenting the Victrola, Roark publicly and privately urges people to see and hear all machines, as no other course is safe. Comparisons are educative, and the buyer should fully avail himself of every opportunity for investigation, not only of the machines but by interviewing owners of machines, and getting the complete record of service delivered. The purchase price is the first payment on some instruments, as repair bills are frequent and expensive.

Look at Roark's stock of chairs and rockers—greatest in county.

Victrola Dominance Grows.

Victrola dominance is greater today than ever before. The latest in the field of standard machines, it quickly emerged from the rest. It has added many vital and exclusive features of construction, and has overtaken everything except demand and while the Victor Co. is annually expending millions in buildings, machinery and equipment, the world calls for more in greater degree each year. Roark places orders many months ahead, and that is why you can place an order now and get what you wish from him.

The Victrola, sterling as the English pound, sells for the same just price, the world around.

A world of music for an atom of price is what every possessor of a Victrola gets. Suitable, appealing, substantial gifts for weddings, anniversaries, holidays can be had at Roark's.

Many new Victor records received by Roark this week.

Who knows more about music than the world's greatest artists? They have chosen the Victrola for the exclusive presentation of their rare art and talents, and their rare art and talents, and their vital opinion is the safest guide for every purchaser of a talking machine. Let Roark demonstrate the supreme Victrola and records.

RED CROSS HEADACHE AND NEURALGIA REMEDY

Relieves neuralgia and chronic headaches. Free from opiates, quickly absorbed and producing immediate relief. Particularly recommended for headaches resulting from excesses. This and more than one hundred other Red Cross Remedies and Toilet Preparations: sold and guaranteed only by R. F. Jarvis, Greenville, Ky.

Wheat Will Win The War.

A noted English statesman said recently that if the people of America had failed to save this year that England and France would have been compelled to withdraw from the fight and as a result the Allies would have lost the war. This demonstrates the importance of wheat and teaches us that Wheat will win the war.

The Government of the United States realizes that the two most important factors in winning the war are men and food and so is drafting the best manhood of the country for the service in the trenches and is calling on the farmers to produce the maximum amount of food.

There is no better way for farmers to answer this call for food than by sowing this Fall every acre to wheat that is possible and to sow it with such care that it will yield a bountiful harvest.

The patriotic farmer will give no thought to the price he will receive for his wheat but will think only of the starving poor of Europe and our boys in the trenches who are fighting our battles and who must be fed.

Our boys are drafted into the army by the Government and the wages they shall receive, which may be the wages of death, are fixed by the Government and the boys do not spend any time figuring whether they can afford to fight our battles for these wages. They know their country has called them and they answer the call without complaint or reservation. Your country is asking you to raise as much wheat as possible and you will not spend any time figuring whether you can afford to grow wheat at the price fixed by the Government. You should realize only that your country has called you and you will do your best for wheat will win the war.

No thought should be given to the possibility of being unable to harvest the wheat next year for the Government will permit no wheat to go to waste but will find some means of providing laborers for the harvest.

England has sent more than six million men to fight her battles and in spite of this will harvest this Fall the largest wheat crop in her history. What England has done America will do.

Every patriotic American citizen salutes his flag when he rises in the morning and says "I will this day do my best to help win the war."

From now until wheat sowing time, the patriotic American farmer will say and say it firmly, "I will this Fall sow all the wheat I can for Wheat will win the War."

Ivan C. Graddy, Farm Agent.

It is now really on over there, and when it is over over there, the world will be better, all over.

Poor Quality High At Any Cost.

The talking machine industry is one of the largest in America, and probably no product has so wide distribution. Easily the leader, the Victrola reigns supreme in all lands. Prices are fixed on instruments and records, and it is a rare thing that a customer even suggests a reduction, so well known is this fact. We have never sold an item of Victor goods at a cut price, and nobody has ever had an offer of this kind from us. Prices on other machines vary according to the individual customer, few, if any, paying the full price, but Victor goods are not distributed on any basis except a fair one. Get most for your investment by purchasing a Victrola, the machine without regrets.

The J. L. Roark Estate, Orien L. Roark, Manager.

Every talking machine in the world is fitted to play Victor records and this recognition of Victor supremacy should be followed by users of other machines. Roark carries in stock more records than all agents in the county combine, and you can hear any record you wish, and your visits are urged.

If you do not have music in your home, you have no foundation on which so many other vital things most rest. Get ALL music, as well as the best, in literature, on the Victrola. Roark county distributor, has placed more than 250 instruments in the county, and his easy terms will enable anyone to own a machine.

The tones of a Victrola spring and mingle as on no other instrument. The light weight on the needle does away with the gritty, grabby, scratchy noise so manifest on all other machines, and insures the supreme delights of music, song and story. See and hear at Roark's.

NOTICE

Under the new laws the Tax Commissioner is required to open an office in the Court House from July 1st. to November 1st. This law requires each and every one to come and give his lists at my office. As there are over 8,000 lists to be made in the County you will see it is important that you come at once and give in your lists.

C. W. CISNEY,
Tax Commissioner.

RED CROSS FAMILY REMEDIES

Many able Chemists and Doctors were called into service in perfecting this line of Red Cross Remedies. This is an age of Specialists, and while one may have distinguished achievements to his credit in one particular line, another is excelling in something else. That very thing makes it possible for us to have a Red Cross Remedy for each ailment, and enables us to give the consumer more than we promise or charge for. Each formula is compounded with as much care and precision as if our entire success depended upon that one Remedy. That's why NEURONE repairs shattered nerves, and Red Cross STONE ROOT and BUCHU puts your kidneys in a normal and healthy condition. Red Cross Remedies are not Patent Medicines. The formula is printed on each carton in plain English, so that you know what they are composed of and what you are taking. More than one hundred Red Cross Remedies and Toilet Preparations are sold and guaranteed only by R. F. Jarvis, Greenville, Ky.

Paint-Without Mystery

Buy paint that you know is good—paint that there's no mystery about. On the back of every can of Hanna's Green Seal Paint you'll find the exact formula of its contents. Thus you take nothing for granted in buying Green Seal. It tells you just what goes to make up its ingredients.

Hanna's Green Seal

is the good-wearing, good-looking paint that expert painters prefer. Try it.

Sold By

G. M. Dexter & Co. Greenville, Ky.

Why children need the Victrola

It's a playmate to them. Keeps them out of mischief. Plays for them to dance or romp—or sings and tells them stories.

But it gives something greater than amusement. A Victrola in the home helps shape the spiritual and mental growth of children, helps form their characters and tastes, helps educate them. And it's a great help to every mother!

Is there a Victrola in your home? You may think you can't afford one, but we'll show you that you can. You'll say you never heard of more generous terms than ours. Victrolas \$15 to \$200. Come in today and hear yours.

FARM ANIMALS

GIVE CROOD SOWS GOOD CARE

Proper Exercise and Protein Feeds in Winter Will Aid in Production of Strong Litters.

(Prepared by the United States Department of Agriculture.)

If the sows that are to farrow in March and April produce good strong, vigorous litters and get their pigs through successfully to weaning time they must be properly cared for from now until the day of farrowing. One of the biggest hindrances to the sows' farrowing good strong, vigorous litters is lack of exercise. During the cold and snowy weather hogs like to lie around the sleeping quarters and be comfortable. That, however, is just what they should not do all the time, advise the specialists of the United States department of agriculture.

The proper exercise for a brood sow is that which she will take voluntarily and not through force. They should get their own exercise by hunting for it in the stalk fields and not by getting it fed around the sleeping quarters on feeding floors or in troughs. Feed them out during the winter months and scatter it out in the stalk fields. The nature of the exercise is a good incentive to use in scattering the corn. Don't be afraid it will be wasted, for it won't. You can readily regulate the amount

Pigs at Self-Feeders.

fed so that it will be picked up clean, and you will find next spring that there is not a bit of the corn lying around to go to waste.

Protein feeds in the form of shorts, tankage, oilmeal or alfalfa hay should be supplied. Self-feeders can be used for these feeds, and it is quite successful to grind the alfalfa hay. Sows will eat a larger percentage of alfalfa hay fed in the ground form than when fed in racks or ground. This alfalfa is generally cheaper on the corn belt farms than any of the other protein feeds and is a good balance to the corn ration.

By following a few of these simple methods the sows will be brought to farrowing time capable of producing good strong pigs. Every hog grower knows that if he is going to have pigs that do their best from the start they must necessarily be strong and vigorous at farrowing time. The proper care of the brood sow is not difficult and should be carefully looked after by every hog grower.

SHEEP ARE MOST PROFITABLE

Produced More Economically on Farm Than Any Other Live Stock—Pick Up Much of Living.

Sheep, in proportion to the value of their products, are produced more economically on the farm than any other live stock; the feed and labor requirements are less. They fit in with general farming, get much of their maintenance from forage from grazing woods and grass that would not support other stock. They eat little feed that has a value as human food, and need less grain than other animals. They add materially to the farm revenue but add very little, relatively, to the farm expense.

BRAN AND CLOVER FOR SHEEP

Nothing Better for Ewes With Lambs During Winter Season—Supply Best of Hay.

Feed straw, fodder and stubble grasses during the winter, but toward spring ewes with lambs should have the best of first-crop clover hay, say, one feed per day. Nothing is better for them than bran and clover hay.

BEST FEED FOR YOUNG PIGS

Skim Milk and Middlings Are Excellent Just After Weaning—Feed Four Times a Day.

Skim milk and middlings make about the best feed for young pigs after weaning. When first weaned they should be fed four times a day, giving only a small quantity each time. When well started, three feeds a day are enough.

OUTDOOR EXERCISE FOR PIGS

Animals Should Be Protected From Cold Winds or Hot Sun—Limit Range for Sows.

Outdoor exercise is beneficial, but pigs should be protected from cold winds or from very hot sun. If the sow is turned out with her pigs, do not give her a very large range at first, as she is likely to travel too far and unduly tire the young.

New York Clipper

KEEP YOUNG HORSE GROWING

Good Practice, When Not Carried to Extremes, to Allow Colts to Rough It in Winter.

(Prepared by the United States Department of Agriculture.)

Colts that are kept growing make the best horses. Some farmers allow their young horses to "rough it" through the winter and, although this is a good practice when not carried to extremes, if the colts are not careful they may give the colts a setback which permanently retards its development.

Feeds that will promote growth should be supplied. Good, clean clover hay is palatable and slightly laxative. Timothy hay commonly is fed. Well-cured alfalfa hay free from dust is one of the best roughages for growing, but because of its relatively high protein content it generally is economical to supplement it with other roughage such as timothy, mixed hay, or corn fodder. Besides leading variety to the ration such a method of feeding alfalfa would offset any likelihood of kidney or bowel irregularities. Sheep oats can be used to good advantage to supplement other roughage. The animals should not be allowed to gorge themselves on dry feed. They should be given only what they will clean up readily, but at the same time enough feed should be supplied. Oats, corn and peas, preferably fed ground, are suitable grains. Bran, oil meal or gluten feed will add protein and lead variety. Cottonseed meal should not be fed to foals. Appropriate grain rations for the first winter are: Two parts corn, five parts oats, three parts bran and one part oil meal; or four parts oats, one part corn and one part bran.

Silage should not be fed to foals to any considerable extent. Sliced roots, such as carrots and sugar beets, are very palatable and have a cooling effect on the digestive system. The quantity of feed generally should be regulated by the appetite, although occasionally the appetite may be too ravenous to be a good indication.

Splendid Young Fillies.

The general condition of the colts and the condition of the feed should be observed daily. Usually not over one pound of grain per 100 pounds of live weight should be fed until the animal is two years old. A liberal supply of salt and good water and plenty of fresh air and exercise are essential for the proper development of young horses. Illness succeeding exercise will cause constipation. It is often said that a horse is lame during his first winter. Certainly this is a critical time in the animal's life, and at no other age will proper feed and attention do as much to make of him a good horse. If stunted during the first winter he never will gain proper size and shape.

During the second winter the feed and management should be nearly the same as for the first winter, except that the quantity of feed should be increased somewhat, the colts tied up in his stall and handled frequently. Education by gentle and careful but firm handling at this age will save later much strenuous labor.

BOAR IN PROPER CONDITION

Good Judgment Is Necessary and Extremes Are to Be Avoided—Vigor Is Essential.

It requires good judgment to keep a boar in the best possible condition. Extremes are to be avoided. The over-fat boar is not satisfactory, and a half-starved one cannot transmit vigor and constitution to its young.

SALT FOR SHEEP IN WINTER

When Feeding for Lamb Crop It Is Well to Remember That You Are Feeding for Wool.

Sheep need a little salt winter as well as in summer. Remember that when you are feeding for the lamb crop you are also feeding for wool. A well-fed, well-parished ewe will shear a heavy fleece.

SOW'S FEED OF IMPORTANCE

Animal Requires Something Besides Meal—Give Her Roots, Alfalfa or Red Clover Hay.

As in the case of the boar, the sow requires something besides meal, and the furnishing of some such feeds as roots, alfalfa or red clover hay, is even more important than in feeding the boar. Skim milk is also excellent when it can be had.

Roark's, Greenville Ky

THE KITCHEN CABINET

There's a song in my heart though my hands be toiling.
The task of the winter mangle.
And my soul makes ready to earth,
ocean and sky
A welcome—a welcome to spring.

RICE A VALUABLE FOOD.

Plain boiled rice well cooked is digested and begins to be assimilated in one hour while many of the other cereals need three and four hours.

Savory Rice.—This dish may be varied in countless ways. First have the rice well cooked; it should be well washed and dropped into rapidly boiling water which has been salted, and allowed to cook until every grain stands out by itself, is tender and yet not mushy. Now take a cupful of cooked rice, put a layer of it in a well-buttered dish, then cover with a small layer of chopped chicken, giblets or any minced meat, with a broth or white sauce well seasoned and added with each layer. Bake until thoroughly hot and serve as a main dish or as a substitute for meat. Tomatoes, with onion and a little chopped beef and rice, prepared in this way is another good dish.

Swedish Rice.—Boil a cupful of rice until tender in salted water. Drain and dry in the oven. Stir into it two tablespoonfuls of sweet fat, the yolks of two eggs well beaten, a teaspoonful of onion juice and salt and pepper to taste. Stir over the fire in a dish set in hot water, using a fork to stir with. Turn into a round bowl to mold, then unmold on a platter and heat in the oven. Serve with drawn butter sauce.

Rice With Eggs.—Take a quarter of a cupful of washed and drained rice, add a tablespoonful of sweet fat and stir until a light yellow over the heat. Add broth, potato or any other vegetable water, and cook covered until the rice is tender, then season well and stir in two or three fresh eggs; stir until cooked, then serve at once. This dish tastes like scrambled eggs, but a very few eggs need be used to serve five. Milk may take the place of the broth in cooking the rice. Skim milk may be used in many such dishes to advantage.

A small amount of boiled rice added to gems, muffins or griddle cakes improves them. Plain boiled rice dressed as mashed potato will serve as a vegetable with steak. Rice made into cakes and fried, or into croquettes and served with a sauce are well-liked dishes.

Economics changes man's activities. As you change a man's activities you change his way of living, as you change his environment you change his state of mind. Precept and instruction do not perceptibly affect man; but food, water, air, clothing, shelter, pictures, books, music, will and do affect him.

A FEW SOUPS AND SALADS.

Soups are economical and will be found most sustaining, the variety cannot be numbered, for new combinations are being discovered each day.

Giblet Soup.—Use the neck, neck, pinions and giblets of three fowls with one pound of finely cut bits of veal and a half a pound of ham.

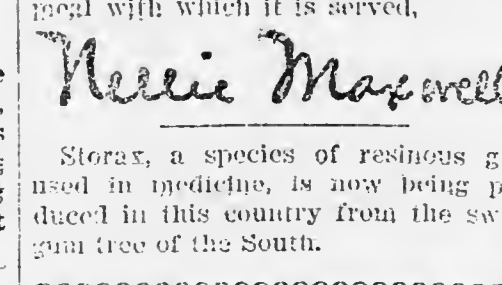

Crack the bones, cut up the giblets and with the meat put all into three quarts of water with a bunch of herbs and a pinch of allspice. Remove the bones, thicken the gravy, season well and serve hot.

Other combinations of meat may be used with the giblets and a smaller amount will make a good soup for a family of four.

Puree of Vegetables.—Cut a turnip, a carrot and a potato in thin slices; add to them a few celery tops, a bay leaf, a cupful of tomato and two quarts of liquid in which beef has been cooked. Simmer gently for one hour; press through a fine sieve; return the mixture to the heat, add a tablespoonful of fat rubbed with two tablespoonfuls of flour, stir until it reaches the boiling point; add a grated onion, a teaspoonful of salt and a saltspoonful of pepper. Serve hot with croissants. This will serve six people at a small cost if the vegetables have been grown at home, more if they must be purchased.

Waldorf Salad.—Cut the tops from the blossom end of nice red apples, scoop out the centers with a sharp-edged teaspoon. Cut the apple in cubes and mix with an equal quantity of cut-up celery, mix with lightly seasoned mayonnaise, squeeze a little lemon juice over the apples to keep them from discoloring before adding the dressing. Fill the cups, set in nests of watercress, and serve. French dressing may be preferred to mayonnaise, depending upon the kind of a meal with which it is served.

Storax. a species of resinous gum used in medicine, is now being produced in this country from the sweet gum tree of the South.

STYLE XVI VICTROLA, \$225

The Aristocrat of the Victor Family

Its very appearance suggests culture and refinement—the kind of instrument you are proud to have in

your home—to have your friends see—that brings you prestige and their respect.

To appreciate its individuality and wonderful tone reproducing qualities it must be seen and heard in comparison with all other models. Artistic—made from choicest woods—beautifully finished—

it enters the finest homes to delight and entertain. To own one is to know complete satisfaction.

The J. L. ROARK ESTATE
GREENVILLE, KENTUCKY

The Victrola is a good friend of the invalid

If the Victrola did nothing more than help to pass the time, it would still be worth while in the sick room.

But it does more than that—it cheers the invalid and helps toward a more rapid recovery.

The portable sizes of the Victrola are to be had at \$15, \$25, \$40, \$50; the cabinet styles from \$75 to \$100. Easy terms can be arranged if desired.

Stop in and we'll gladly demonstrate the Victrola and play any music you wish to hear.

LIVER DIDN'T ACT DIGESTION WAS BAD

Says 65 year Old Kentucky Lady, Who Tells How She Was Relieved After a Few Doses of Black-Draught.

Meadersville, Ky.—Mrs. Cynthia Higginbotham, of this town, says: "At my age, which is 65, the liver does not act so well as when young. A few years ago, my stomach was all out of fix. I was constipated, my liver didn't act. My digestion was bad, and it took so little to upset me. My appetite was gone. I was very weak."

I decided I would give Black-Draught a thorough trial as I knew it was highly recommended for this trouble. I began taking it. I felt better after a few doses. My appetite improved and I became stronger. My bowels acted naturally and the last trouble was soon righted with a few

doses of Black-Draught."

Seventy years' successful use has made Theodor's Black-Draught a standard, household remedy. Every member, of every family, at times, need the help that Black-Draught can give in cleansing the system and relieving the troubles that come from constipation, indigestion, lazy liver, etc. You cannot keep well unless your stomach, liver and bowels are in good working order. Keep them that way. Try Black-Draught. It acts promptly, gently and in a natural way. If you feel sluggish, take a dose tonight. You will feel fresh tomorrow. Price 25c. a package—One cent a dose. All druggists.
